Skills

Rust(Tokio, Kafka), C++, Go

Python, Pytorch

Linux, Git, PostgreSQL

Cuda, Matlab

Hobby/Interest

- Japanese Language & Culture

Languages

Polish - Native

English - C1

German - B1

Engineer, leveraging low-level optimization skills to build high-performance Web3 protocols and AI infrastructure. Focused on memory safety and distributed systems.

Work History

08.2025 - present

Software Engineering Intern

Nokia, Wrocław

Fine-tuning large-scale models in a high-end, multi-GPU environment.
Analyzing and developing C++ low-level code.
Studying 5G and related communication technologies.

Education

10.2023 - present

BSc in Algorithmic Computer Science (Year 3)

Wrocław University of Science and Technology

Backend Engineer at Solvro Science Club (Mobile App)
Member of Nabla (Qubit) Science Club – Quantum Informatics Research

Projects

Compiler for custom imperative language

Technologies: C, Yacc, Lex

Built a compiler-to-VM pipeline targeting high-performance execution.
Link: https://github.com/unseen2004/compiler

Turn-based cli game

Technologies: Rust, Tokio, Axum, Ratatui, Serde

Turn-based tactics game with a Rust server and a terminal client.
https://github.com/unseen2004/cli_game

Endless Runner (2D Infinite Running Game)

Technologies: C++, Raylib

Developed a modular C++17 game with object-oriented design.
Implemented cross-platform builds with CMake.
Link: https://github.com/unseen2004/endlessRunner

Chinese Checkers (Classic Board Game Implementation)

Technologies: Java, JavaFX, Spring Boot

Designed and implemented a digital Chinese Checkers with a visually appealing interface and multiplayer client-server architecture.
Link: https://github.com/unseen2004/chineseCheckers

Multithreaded Web Server with LRU Cache and RDMA

Technologies: C++, RDMA, Docker

Static web server written in modern C++ featuring asynchronous networking, intelligent caching, and optional RDMA support for low latency data delivery.
https://github.com/unseen2004/stereorepo/tree/main/webserver_cache_rdma

Certificates

08.2025 **The Fundamentals of RDMA Programming**

09.2025 **5G Network Fundamentals**
